

BWS - Building Waste Sustainable Management

The 'Building Waste Sustainability: New capacities for sustainable waste management' Project – BUILDING SUSTAINABILITY IN WASTE DISPOSAL: NEW CAPACITIES FOR ITS MANAGEMENT - has been financed by the IPA Adriatic CBC Programme through a contribution of 1.6 million Euros. The Project's Lead Beneficiary is the Municipality of Bushat, Albania, in partnership with three other Municipal Governments – the Municipality of Kamez for Albania, the Municipality of Bar for Montenegro, and the Municipality of Macerata for Italy – and two entities based in the territory of Macerata: Cosmari and Cooperativa Sociale Meridiana.

The Project Partners are involved in programmes that contribute to strengthening the Adriatic-Ionian Macro Region and the process of integration into the European Union taking place in the countries on the other side of the Adriatic Sea. This partnership also provides an opportunity for growth, the broadening of knowledge and mutual exchange, as can be seen in the twinning between the city of Macerata and that of Kamez.

The climate change challenge makes environmental sustainability a topical subject as never before and compels reflection and the adoption of shared ways of implementing good practice policies that can change our lifestyles and make us more concerned with the environment.

The BWS project has received funding by the EU within the framework of IPA Adriatic CBC Programme is co-financed by the Instrument of Pre-Accession Assistance
